

# 4.4x55mm AMJ Custom

## Overview

---

4.4x55mm AMJ Custom is an extreme long range wildcat cartridge constructed using a 12.7x55mm casing necked down to .17 HMR/4.4mm projectiles. It is capable of reaching extreme velocities but due to the limited mass of the projectiles it does not offer enormous amounts of damage down range.

## Stats

---

Note: 343.2 m/s is the subsonic barrier - anything below that is considered subsonic. Subsonic ammunition removes the bullet crack down range making the round better suited to stealth.

Ammunition Type	Damage	Bullet Velocity (m/s)	Barrier Penetration	Armor Piercing
15gr FMJ	4.9	1982	0.9	5
17gr FMJ	5.5	1875	1.9	5
20gr FMJ	5.7	1799	3.9	5

Note: Barrier penetration represents the rounds ability to go through walls and barriers. Armor piercing represents the rounds ability to penetrate body armor plates.
